Town & Country Celebrates 15 Years of Success with Phoenix™ PFM Crowns and Bridges

Town & Country Dental Studios is celebrating 15 years of clinical success with their 86% gold Phoenix™ PFM Crowns and Bridges. Phoenix marries high esthetics with PFM reliability, and is prescribed with confidence for all anterior and posterior positions in the mouth. With over **20,000 units** fabricated since its introduction in 1989, Phoenix has become this laboratory's flagship PFM restoration.

The heart of a Phoenix restoration is Phoenix Gold™: a warm 86% Gold, 11% Platinum alloy. Palladium-free and silver-free, Phoenix Gold has greater retentive strength and better porcelain bonding strength than other softer, high-gold alloys. Esthetically, Phoenix Gold has a more natural gold color without using color enhancers or fillers, and the 86% gold content enhances the vitality and warmth of the Ceramco III porcelain.

Phoenix Gold is precision cast using the most advanced vacuum/pressure casting equipment available. The resulting substructure provides superior esthetics at the cervical margins, more natural emergence profiles, better fit, and less need for bulk than with other alloys. Phoenix restorations are finished with Ceramco III porcelain for optimal translucency, true opalescence and chairside polishability. Phoenix restorations are highly biocompatible and don't require special bonding or cementation. And, for ultimate esthetics, add CapellaSix to your Phoenix restoration.

Town & Country Dental Studios is recognized as a leading full-service lab in the Northeastern United States. Established in 1962, Town & Country prides itself on delivering consistent, high-quality restorations, outstanding customer service and innovative treatment planning solutions. All Town & Country crowns, bridges, implants and veneers are crafted with the pride, service and attention to detail that you can only get from a 3rd generation, family-run laboratory.
