

OUR DENTAL RESTORATIONS ARE MADE IN THE USA

All restorations from Town & Country Dental Studios are fabricated in our state-of-the-art laboratory located in Freeport, Long Island, New York.

Since our founding in 1962, we have fabricated hundreds of thousands of dental prostheses using high-quality, FDA approved materials, purchased from established US companies.

We take great pride in being a successful family-owned Long Island business, and one of the leading dental laboratories in the United States.
